

# LEADING WASTE MANAGEMENT OEM INDUSTRIAL CONTAINERS

## AVIENT SOLUTION

Hydrocerol™ and Excelite™ Chemical Foaming Agents (CFA)

## WHY AVIENT?

- Preserved industrial waste container quality while maintaining functional performance and application dimensional stability
- Provided expertise in process optimization and polymer formulation, where material & mold flow, reducing cycle times, and color harmony between diverse polymers matter most
- Accelerated speed to market by several weeks with versatile agnostic product forms (solid and liquid) coupled with technical service

## LEARN MORE

## KEY REQUIREMENTS

- Eliminate shrinkage and warpage, and control dimensional aspects of finished parts
- Improve quality assurance metrics and reduce downtime associated with quality rejections
- Reduce process parameter changes and maintain consistency when running multiple colors
- Lightweighting solution offering energy savings, process optimization & extended manufacturing run times
